■ QR Code Generator

A simple web-based **QR Code Generator** built with **HTML, CSS, and JavaScript**. It allows users to input text or a URL and instantly generate a downloadable QR code.

■ Features
- Generate QR codes from any text or URL.
- Download the generated QR code as a PNG file.
- Responsive and user-friendly interface.
- Error handling with animation when input is empty.
- Press **Enter** key to generate QR quickly.

■■ Tech Stack
- HTML5
- CSS3
- JavaScript (Vanilla JS)
- QR Server API

■ Project Structure
QRcode.html - Main HTML file
QR_Code.css - Styling (CSS)

■ How to Run
1. Clone this repository:
```
git clone https://github.com/your-username/qr-code-generator.git
```
2. Open **QRcode.html** in your browser.
3. Enter text/URL → Click **Generate QR Code**.
4. Download the QR code image.
